Financial Advisors

### Check out our innovative internship program.

Jones & Roth offers internships for university sophomores, juniors and seniors interested in public accounting as a career. The goal of our Career Development Internship Program is to provide you with exposure to “real world” accounting. Your internship will give you a chance to learn about the profession and the opportunity to learn about tax, auditing and accounting services. We provide an environment that is open and interactive, utilizing a hands on approach to learning.

#### Program Highlights:

- Flexible work schedules. You don't need to take the term off to accept our internship. Your work hours will accommodate your class schedule.
- Winter, summer and year round opportunities. Many of our winter and summer interns have continued to intern year round.
- Long-term employment potential. Most of our staff accountants started as an intern. In fact, many of managers, senior managers and partners were former interns.
- Our firm culture. Even as we're working hard, you'll see smiles and hear laughter.
- Get hands on training from our experienced staff. Learn how to apply your education in the “real world” of public accounting.
- Internships are paid positions! You're working hard, you deserve a reward.
